¶ To know the time of the Tydes in a more exact and ready manner, then heretofore hath been set forth by any; the use followeth.

Daies after the Change or Full the Moon is South at

0	1	2	3	4	5	6	7
12	12 48	1 36	2 24	3 12	4 0	4 48	5 36

Daies after either of the Quarters the Moon is South at

0	1	2	3	4	5	6	7
6	6 48	7 36	8 24	9 12	10 0	10 48	11 36

FIrst finde the new Moon, Full or Quarter in the Kalender, then count how many dayes are past either of those, and under the same number of daies past, you shall here see the time that the Moon will be South the same day: then look for the Haven or Port you desire, and where the houres and quarters stand before the same, there it is high-water so many houres and quarters before the time above found: but where the houres and quarters stand after the place, there it is high water so long after the time first found. As for example.

The 5 day of January (that is, five daies compleat past the last quarter) in this Table above I finde her South, being the fifth day after the quarters, at ten of the clock, which maketh Tyde at Quinborough; but at Rye, it is Tyde three quarters before, and at Gravesend an houre and two quarters, viz. one houre and an halfe after time, &c.
